

1. Site Work – Earthwork, Drainage, Sanitary Sewer, Water Mains, Asphalt Paving and Striping, pavement markings, site signage and Site Concrete.
2. Interior Drywall , Acoustical Ceiling

Quantities Corp is has also invested in the development of a patented (US Patent **6,393,410**) web-based preconstruction solution designed to meet a critical need in the global construction industry. This proprietary system uses a simple and cost-effective process that strategically combines state-of-the-art technology with industry-specific business intelligence to allow firms to have their bids prepared in a fraction of the normal time and for a fraction of the normal cost. We are confident that our system has the potential to permanently change the way that the industry procures preconstruction services.

To support Quantities' successful growth, we have recently redesigned our website, quantities.com. This site is currently running in beta mode and will be live at the end of April 2018. It will feature a comprehensive portfolio of our projects. I have included with this letter an overview of **Quantities Inc.** which includes a small sample of our completed projects for your review.

I would like to request an opportunity to meet with you to share in more detail information about our capabilities and our vision for how our organizations can partner in the future. I will follow up with you in the next two weeks to schedule a mutually convenient time for our discussion.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Frederick Thompson', is positioned above the printed name.

Frederick Thompson, CEO
Quantities Inc.
