

OHL USA

August 31st, 2016

To Whom It May Concern:

I am pleased to provide this letter of recommendation for Quantities Inc., on behalf of our company Obrascón Huarte Lain (OHL). We are an international concessions and construction group with a 100-year history, operating in 30 countries across five continents. OHL is recognized as a leader in roadway and bridge building. OHL Group operates in the US through its subsidiary OHL USA, which has engaged Quantities Inc., for multiple major projects over the past several years.

Our experience working with Quantities Inc., has been one of complete satisfaction and we consider Quantities' president, Fred Thompson, to be one of our preferred and most trusted partners due to the extensive expertise of Fred and his team as well as their unwavering commitment to ensuring that the construction takeoffs, estimates and general construction services they provide are of the highest quality.

The projects that we have assigned to Quantities include the construction of a major transportation station in Miami Dade, Florida. This \$360 million project included building a new Metrorail station with a 2.4 mile guideway (segmental bridge), St. Catharine's Health Care Facility, a \$627 million project in Niagara, Ontario Canada and Centre Hospitalier de l'Université de Montréal "CHUM" Hospital, a \$2.1 billion project in Montreal, Quebec. This 22-story hospital occupies two full city blocks and has over 349,000 m² of floor space, 772 single-bed rooms and an energy center, making it one of North America's largest academic medical centers which required that we used the most professional and experienced contractors possible, which made Fred and his team the perfect choice.

Quantities Inc., provided us with comprehensive quantity takeoff, estimating, and general construction services for the project. Every step of the way, the Quantities team was attentive to detail, our budget and our delivery schedule. With Fred's confident leadership and his ability to work seamlessly with a wide range of project constituents, this project was completed smoothly, meeting every requirement.

OHL considers Fred and the Quantities Inc., team partners in our business and we highly recommend them to other construction firms.

Sincerely,

Gonzalo Peschiera
Business Development Manager
